1) Symbolic Logic : Introductory

- a) Logic : Nature and Scope
- b) Symbolic Logic as a modern branch of logic
- c) Symbolic Logic : Nature ,Scope and applications.
- d) Importance of Symbolic Logic.
- e) Symbolic Logic and Computation.

2) Basic Concepts in Symbolic Logic.

- a) Propositions and Propositional Forms.
 - i) Simple and Compound Propositions.
 - ii) Various types of compound propositions
- b) Argument and argument form : Truth and Validity
- c) Symbolizing Propositions and Argument forms .
- d) Propositional variables and logical constants.
- e) Main Logical Connectives (Constants) and its basic truth tables.

3) Decision Procedures

- a) Nature of decision procedure
- b) Types of decision Procedures : Truth table method, Shorter truth table method, and truth tree method.
- c) Merits and Demerits of decision procedure
- d) Deciding tautology , contradiction and contingent by truth table method, shorter truth table method and truth tree method.
- e) Practical examples on above decisions procedures.

4) Deductive Proof

- a) Nature of deductive proof.
- b) Rules of inference and Rules of replacement.
- c) Proving Validity by using rules of inference and rules of replacement .
- d) Incompleteness of 19 rules.
- e) Conditional proof and indirect proof : Its nature and Practical examples.

5) Proving Invalidity.

- a) Proof of Invalidity : Its nature and techniques
- b) Use of method of assigning truth values to demonstrate the invalidity of invalid arguments.
- c) Application of the methods of reasoning to examples of different kinds.
- d) Practical examples on proving invalidity of invalid arguments.

6) Proof of Tautologies

- a) Conditional Proof
- b) Practical Examples on Tautologies by C.P.
- c) Indirect Proof
- d) Practical examples on tautologies by I.P.

7) Predicate Calculus

- a) Need for the study of predicate structure of propositions
- b) Two types of propositions : Singular and General
- c) Individual Variables and , individual constants , predicate variables and predicate constants.
- d) Exercises on Symbolizing general propositions.
- e) Propositional functions and quantifiers : Its Nature and function.

8) Deductive demonstration of validity of arguments.

- a) Explaining the need for quantification rules.
- b) Rules of Quantification in predicate logic
- c) Explaining the nature , form and use of each of the four quantification rules :
UI, UG, EI and EG (Preliminary version only)
- d) Proving validity of arguments involving quantifiers using quantificational rules : Direct Proof , Indirect Proof and conditional proof
- e) Exercises on proving validity by direct , indirect and conditional proof .
