

Testimonial

I am Miss Kanakdande Amruta P. Research Scholar working under the guidance of Prof. C.N. Khobragade. We have instrumentation facility from RUSA in our campus with sophisticated equipments. Various seminars, workshops and hands on sessions are organised with the support from RUSA in our campus which were helpful in my day to day research work.

I was part of RUSA project sanctioned to Prof. C.N.Khobragade on "Herbal Formulation to Treat Urolithiasis". Being a research student and a part of this project, got an opportunity to handle various sophisticated instruments. Project outcome in the form of tablet is ready to commercialise and we have got FDA approval for the same. It was possible only due to funding from RUSA .

Thank you.
