

## **Testimonial**

I am Sagar Ramesh Jadhao, research student working under the guidance of Prof CN Khobragade who is an integral part of RUSA technology transfer project sanctioned to SRTM University Nanded. Under the RUSA facility centre which is equipped with sophisticated instrumentation facility like HPLC and other instruments were very helpful for the development of pharmaceutical products. These instruments are very useful in my day to day research work, and the outcome of my research findings have given promising results which will be soon going to file patent in Indian patent office Mumbai.
