**SWAMI RAMANAND TEERTH MARATHWADA  
UNIVERSITY, NANDED - 431 606 (MS)**

**(Credit Framework and Structure of Four Year UG Program with  
Multiple Entry and Exit Option as per NEP-2020)**

**UNDERGRADUATE PROGRAMME OF  
SCIENCE & TECHNOLOGY**

Major in **Computer Science** and Minor in **DSM**

**Under the Faculty of Science & Technology**

**B. Sc. S.Y.**

**Effective from the Academic year 2025 – 2026**

**(As per NEP-2020)**

## **From the Desk of the Dean, Faculty of Science and Technology**

Swami Ramanand Teerth Marathwada University, Nanded, enduring to its vision statement “Enlightened Student: A Source of Immense Power”, is trying hard consistently to enrich the quality of science education in its jurisdiction by implementing several quality initiatives. Revision and updating curriculum to meet the standard of the courses at national and international level, implementing innovative methods of teaching-learning, improvisation in the examination and evaluation processes are some of the important measures that enabled the University to achieve the 3Es, the equity, the efficiency and the excellence in higher education of this region. To overcome the difficulty of comparing the performances of the graduating students and also to provide mobility to them to join other institutions the University has adopted the cumulative grade point average (CGPA) system in the year 2014-2015. Further, following the suggestions by the UGC and looking at the better employ ability, entrepreneurship possibilities and to enhance the latent skills of the stakeholders the University has adopted the Choice Based Credit System (CBCS) in the year 2018-2019 at graduate and post-graduate level. This provided flexibility to the students to choose courses of their own interests. To encourage the students to opt the world-class courses offered on the online platforms like, NPTEL, SWAYM, and other MOOCS platforms the University has implemented the credit transfer policy approved by its Academic Council and also has made a provision of reimbursing registration fees of the successful students completing such courses.

SRTM University has been producing a good number of high calibre graduates; however, it is necessary to ensure that our aspiring students are able to pursue the right education. Like the engineering students, the youngsters pursuing science education need to be equipped and trained as per the requirements of the R&D institutes and industries. This would become possible only when the students undergo studies with an updated and evolving curriculum to match global scenario.

Higher education is a dynamic process and in the present era the stakeholders need to be educated and trained in view of the self-employment and self-sustaining skills like start-ups. Revision of the curriculum alone is not the measure for bringing reforms in the higher education, but invite several other initiatives. Establishing industry-institute linkages and initiating internship, on job training for the graduates in reputed industries are some of the important steps that the University would like to take in the coming time. As a result, revision of the curriculum was the need of the hour and such an opportunity was provided by the New Education Policy 2020. National Education Policy 2020 (NEP 2020) aims at equipping students with knowledge, skills, values, leadership qualities and initiates them for lifelong learning. As a result the students will acquire expertise in specialized areas of interest, kindle their intellectual curiosity and scientific temper, and create imaginative individuals.

The curriculum given in this document has been developed following the guidelines of NEP-2020 and is crucial as well as challenging due to the reason that it is a transition from general science based to the discipline-specific-based curriculum. All the recommendations of the Sukanu Samiti given in the NEP Curriculum Framework-2023 have been followed, keeping the disciplinary approach with rigor and depth, appropriate to the comprehension level of learners. All the Board of Studies (BoS) under the Faculty of Science and Technology of this university have put in their tremendous efforts in making this curriculum of international standard. They have taken care of maintaining logical sequencing of the subject matter with proper placement of concepts with their linkages for better understanding of the students. We take this opportunity to congratulate the Chairman(s) and all the members of various Boards of Studies for their immense contributions in preparing the revised curriculum for the benefits of the stakeholders in line with the guidelines of the Government of Maharashtra regarding NEP-2020. We also acknowledge the suggestions and contributions of the academic and industry experts of various disciplines.

We are sure that the adoption of the revised curriculum will be advantageous for the students to enhance their skills and employ ability. Introduction of the mandatory On Job Training, Internship program for science background students is praise worthy and certainly help the students to imbibe firsthand work experience, team work management. These initiatives will also help the students to inculcate the workmanship spirit and explore the possibilities of setting up of their own enterprises.

**Dr M. K. Patil**

**Dean**

**Faculty of Science and Technology**

**SRTMU, Nanded**

## **From the Desk of Chairman, Board of Studies in Computer Science and Applications**

Dear Students, Faculty, and Stakeholders,

It gives me immense pleasure to introduce the B.Sc. in Computer Science as Major program, accurately designed to equip students with cutting-edge knowledge and hands-on expertise in the ever-evolving field of Computer Science.

In today's digital era, computer science forms the backbone of innovation, driving advancements in Artificial Intelligence, Cybersecurity, Data Science, Web Technologies, and more. Our curriculum is structured to provide a strong theoretical foundation while emphasizing practical, industry-relevant skills that prepare students for global challenges.

Our B.Sc. Computer Science (Major) program offers a comprehensive and future-ready syllabus, covering essential domains such as: Core Programming (C, C++, Java, and Python), Web Development Technology (HTML, CSS, JavaScript, WordPress), Database Management (RDBMS, Data Analysis), Cybersecurity & Networking (Cyber Security, Computer Networks) and Emerging Technologies (Machine Learning, Data Science, Digital Image Processing). With a balanced mix of theory, coding labs, and projects, students will develop problem-solving abilities, logical reasoning, and creativity that are key traits for a successful career in Computer Science and IT Industry.

We have incorporated industry-demanded courses like Machine Learning, Data Science, and Cybersecurity in the curriculum of B. Sc. T.Y. to ensure graduates are job-ready. Additionally, Web Development using WordPress and Python programming opens doors to freelancing and entrepreneurship opportunities. Beyond Academics, we encourage students to engage in hackathons, internships, and research projects to gain hands-on experience.

As the Chairman of the Board of Studies, I assure you that our program is continuously updated to align with global standards.

We sincerely thank all of the experts who provided their insightful comments and recommendations in order to improve the contents, we have made every effort to take each of them into consideration.

**Regards**

**Prof. Dr Sudhir Jagtap**

Chairman, Board of Studies

Computer Science and Applications

# Semester III

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC (Major)**

**Course Title: Data Structure Using C**

**Course Code: SCSCCT1201**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30 Hrs.**

**Course Objectives:**

1. To provide the students with solid foundations in the basic concepts of programming: data structures and algorithms.
2. To understand basic computational concepts and elementary data structures.
3. To translate well-structured plans into working programs.
4. To analyze simple problems involving text and numbers.

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Implement Arrays and Linked-list for representation of Data.
2. Understand how several fundamental algorithms work particularly those concerned with Stack, Queues, Trees and various Sorting algorithms.
3. Design new algorithms or modify existing ones for new applications.
4. Analyze the space and time complexity of algorithms.

| Unit No.   | Title of Unit & Contents                                                                                                                                                                                                                                | Hrs.      |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>I</b>   | <b>Introduction to Data Structure</b>                                                                                                                                                                                                                   | <b>10</b> |
|            | Definition, Classification of Data Structure: Primitive and non-primitive. Operations on Data Structures, Introduction to arrays, Representation of Array in Computers Memory, Array Operations: Traversing, Insertion, Deletion, Searching and Sorting |           |
| <b>II</b>  | <b>Linked List</b>                                                                                                                                                                                                                                      | <b>08</b> |
|            | Definition, Components of Linked List, Representation of Linked List in Computers Memory, Advantages and Disadvantages of Linked List, Operations on Linked List: Traversing, Insertion, Deletion, Searching.                                           |           |
| <b>III</b> | <b>Stack and Queue</b>                                                                                                                                                                                                                                  | <b>07</b> |
|            | <b>Stack</b> – Introduction to Stack, Array Representation of Stack Operations on Stack- PUSH And POP<br><b>Queue</b> - Introduction to Queue, Operations on Queue-Insertion and Deletion                                                               |           |
| <b>IV</b>  | <b>Tree and Graph</b>                                                                                                                                                                                                                                   | <b>05</b> |
|            | Definition: Tree, Binary tree, complete binary tree, Binary search tree, Graphs – Terminology, Representation of Graph.                                                                                                                                 |           |

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Lab Course 3**

**Course Code: SCSCCP1203**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60Hrs.**

---

**Suggestive Practical list**

1. Program for traversing an array.
2. Program for searching an element in an array.
3. Program for sorting array elements.
4. Program for inserting & deleting elements from an array
5. Program for merging operation.
6. Program for stack implementation.
7. Program for queue implementation.
8. Program for implementation of Linked List.
9. Program for searching from Linked List.
10. Program for sorting Linked List.

Note: Implement above programs in C language.

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Programming in C++**

**Course Code: SCSCCT1202**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30Hrs.**

**Course Objectives:**

1. To learn OOPs concepts
2. To understand how C++ improves C
3. To learn how to design C++ classes for code reuse.
4. To apply programming skills to develop software.

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Understand and apply OOPs concepts.
2. Write and execute C++ Programs.
3. Understand concept of Functions and inheritance in C++.
4. Apply programming skills to develop software.

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Lab Course 4**

**Course Code: SCSCCP1204**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60 Hrs.**

---

**Suggestive practical list**

1. Write programs using: Input / Output statements,
2. Write programs using: Control statements and Loops
3. Design and Implementation of class
4. Design and Implementation of constructor
5. Design and Implementation of destructor
6. Design and Implementation of Friend Function
7. Design and Implementation of Function Overloading
8. Design and Implementation Operator Overloading
9. Design and Implementation of Inheritance
10. At least 15 Programs on C++

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: Minor**

**Course Title: Programming Logic Concepts**

**Course Code: SCSCMT1201**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30Hrs.**

**Course Objectives:**

1. To understand fundamental problem-solving techniques, including top-down design and algorithmic thinking.
2. To analyze the efficiency of algorithms using basic complexity analysis.
3. To implement algorithms using flowcharts and pseudocode before translating them into C programs.
4. To apply core programming concepts in C, including variables, data types, operators, control structures, loops, arrays, and functions.

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Design structured solutions to problems using top-down decomposition and algorithmic approaches.
2. Write syntactically correct and logically efficient C programs for given computational tasks.
3. Compare different algorithms (e.g., sorting, searching) based on time and space complexity.
4. Construct flowcharts to represent program logic before implementation.

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: Minor**

**Course Title: Lab Course Minor 1**

**Course Code: SCSCMP1202**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60Hrs.**

---

**Suggestive practical list**

1. Implementation an algorithm for swapping two numbers.
2. Implementation an algorithm to find the sum of first n natural numbers.
3. Implementation an algorithm Generate the Fibonacci sequence
4. Implementation an algorithm of smallest divisor of a number
5. Implementation an algorithm Generate prime numbers
6. Implementation an algorithm Check if a number is Armstrong
7. Implementation an algorithm Reverse the order of elements in an array.
8. Implementation an algorithm Find the maximum number in an array.
9. Implementation an algorithm Sort an array using bubble sort (exchange sorting).
10. Implement binary search on a sorted array.
11. All Algorithms are performed using C Programming Language

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: Generic Elective**

**Course Title: Cyber Security**

**Course Code: SCSCGE120**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30Hrs.**

**Course Objectives:**

1. Learn the foundations of Cyber security and threat landscape.
2. To equip students with the technical knowledge and skills needed to protect and defend against cyber threats.
3. To develop skills in students that can help them plan, implement, and monitor cyber security mechanisms to ensure the protection of information technology assets.
4. To expose students to governance, regulatory, legal, economic, environmental, social and ethical contexts of cyber security.
5. To expose students to responsible use of online social media networks.

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Understand the cyber security threat landscape.
2. Develop a deeper understanding and familiarity with various types of cyberattacks, cybercrimes, vulnerabilities and remedies thereto.
3. Analyse and evaluate existing legal framework and laws on cyber security.
4. Analyse and evaluate the digital payment system security and remedial measures against digital payment frauds.
5. Analyse and evaluate the importance of personal data its privacy and security

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: SEC/VSC**

**Course Title: Web Programming**

**Course Code: SCSCVSC1201**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60Hrs.**

**Course Objectives:**

1. To describe the architecture of the World Wide Web, including the roles of browsers, websites, and web pages.
2. To construct well-structured HTML documents using basic tags.
3. To design interactive web pages with hyperlinks, tables, and forms.
4. To apply CSS for styling web pages.
5. To implement advanced CSS features.

**Course Outcomes:**

After completion of the course, the student will be able to –

1. Write syntactically correct HTML code to structure web content (tables, forms, lists).
2. Create user-friendly forms with validation-friendly input types and multimedia integration.
3. Style web pages using CSS properties and layout techniques.
4. Build a complete website combining HTML semantics and CSS styling

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Programming in Java**

**Course Code: SCSCCT1251**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30 Hrs.**

**Course Objectives:**

1. To write syntactically correct Java programs.
2. To implement control structures to manage program flow.
3. To design classes with constructors, methods, and overloading, applying OOP concepts.
4. To utilize inheritance and method overriding to create hierarchical class structures.
5. To organize code using packages and handle errors via exception handling.

**Course Outcomes:**

After completion of the course, the student will be able to –

1. Demonstrate the ability to set up a Java environment (JDK, IDE) and execute simple programs.
2. Construct programs using control structures for logical flow.
3. Apply OOP concepts (classes, objects, inheritance) to solve problems.
4. Create and manipulate data structures (arrays, strings) efficiently.
5. Design reusable code using packages and handle runtime errors with try-catch blocks.
6. Debug and optimize Java programs for correctness and readability.

| Unit No.   | Title of Unit & Contents                                                                                                                                                                                                                 | Hrs.      |

**Course Title: Lab Course V**

**Course Code: SCSCCP1253**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60 Hrs.**

---

**Suggestive practical list**

1. Write programs using: Input / Output statements,
2. Write programs using: Control statements and Loops
3. Design and Implementation of class
4. Design and Implementation of constructor
5. Design and Implementation of Method overloading
6. Design and Implementation Method overriding
7. Design and Implementation of Inheritance
8. Design and Implementation of Interface
9. Design and Implementation of Packages
10. At least 15 Programs on Java

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Relational Data Base Management System (RDBMS)**

**Course Code: SCSCCT1252**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30Hrs.**

**Course Objectives:**

1. To explain the architecture of DBMS, its users, and languages (DDL, DML, DCL).
2. To model database cases using E-R diagrams and Relational Models
3. To normalize databases to 1NF, 2NF, 3NF
4. To use SQL for database creation

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Demonstrate the role of DBMS in modern data management and its superiority over file systems.
2. Translate real-world scenarios into E-R diagrams and Relational schemas.
3. Normalize databases to reduce redundancy and improve efficiency.
4. Write SQL queries to create, modify, and retrieve data from tables.

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: DSC Major**

**Course Title: Lab Course VI**

**Course Code: SCSCCP1254**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60 Hrs.**

---

**Suggestive practical list**

1. Create following tables, Accounts, Inserting Records in the Tables
2. Use of ALTER TABLE Command
3. Study and Perform to use of DML commands
4. Study and Perform to use Arithmetic & logical Operators
5. Study and Perform for logical & Comparison operators
6. Study and Perform for Single Row Function
7. Study and Perform for Multiple Row Function
8. Study and Perform for Joining Tables (Equi-Join, Non-Equi Join, Outer Join)
9. Study and Perform Subqueries
10. Study and Perform PL/SQL Blocks
11. Study and Perform PL/SQL Blocks with control looping statements

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: Minor**

**Course Title: Web Technology**

**Course Code: DSCMT1251**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30Hrs.**

**Course Objectives:**

1. To explain the evolution of the World Wide Web (WWW), client-server architecture, and the roles of browsers/servers.
2. To construct well-structured HTML5 documents using semantic elements, multimedia tags, and forms with modern input types.
3. To style web pages using CSS3 properties and implement responsive designs with media queries.
4. To create interactive web pages with JavaScript, including event handling, and form validation.

**Course Outcomes:**

After completion of the course, the student will be able to –

1. Demonstrate understanding of web architecture.
2. Design static web pages using HTML5 with proper document structure and semantic markup.
3. Apply CSS3 to create visually appealing, responsive layouts and animations.
4. Develop dynamic user interfaces with JavaScript.

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60 Hrs.**

---

**Suggestive Practical List**

1. Study and Perform to Use Chrome/Firefox DevTools
2. Study and Perform to use free hosting
3. Study and Perform to use <header>, <section>, <footer>, and <article>
4. Study and Perform Interactive Form
5. Study and Perform Multimedia Gallery
6. Study and Perform Box Model
7. Study and Perform Responsive Layout
8. Study and Perform DOM Manipulation
9. Study and Perform Form Validation
10. Study and Perform Personal Portfolio Website

**Swami Ramanand Teerth Marathwada University, Nanded**

**Faculty of Science and Technology**

**Subject: Computer Science**

**Course Type: Generic Elective**

**Course Title: Data Analysis**

**Course Code: SDSCGE1251**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 30 Hrs.**

**Course Objectives:**

1. To find insights within organizational data.
2. To explore Tableau creator functionality required for new Tableau users.
3. To build Interactive dashboards and share them with others.
4. To create simple visualizations and moves to an in-depth look at the different chart and graph functions, calculations, mapping and other functionality.

**Course Outcomes:**

After completion of the course, the student will be able to –

1. Explain the fundamentals of analysis of data in Excel and Tableau.
2. Work with different Data Collection Structures.
3. Handle various sources of data using MS Excel, Tableau.
4. Formulate the organizational data, create charts or graphs to provide visuals of the data.
5. Predict the business scope using visualizing and analyzing techniques of MS Excel and Tableau.

**Course Title: Web Programming using WordPress**

**Course Code: SCSCVSC1251**

**Credits: 02**

**Max. Marks: 50**

**Lectures: 60Hrs.**

**Course Objectives:**

1. To understand the fundamentals of web development and content management systems.
2. Manage content effectively using WordPress's built-in tools.
3. Develop responsive websites compatible with various devices.
4. Deploy and maintain WordPress websites on web hosting platforms.

**Course Outcomes:**

After completion of the course, the student will be able to-

1. Install and set up a WordPress website.
2. Customize WordPress themes to match design requirements.
3. Integrate plugins to extend the functionality of WordPress websites.
4. Develop responsive websites compatible with various devices.
